HELVETICA PHYSICA ACTA

VOLUMEN 62, 1989

CONTENTS – INHALTSVERZEICHNIS – TABLE DES MATIÈRES

Fascicle 1

24. 1. 1989

Amrein, W.O., Boutet de Monvel-Berthier, A.M., and Georgescu, V.: On Mourre's approach to spectral theory 1

Pearson, D.B.: A commutator approach to the limiting absorption principle 21

Van Praag, P.: Sur les déterminants des matrices quaternioniennes 42

Aaberge, T.: A preliminary framework for continuum thermodynamics 47

Hongler, M.-O., and Figour, J.: Periodic versus chaotic dynamics in vibratory feeders ... 68

Piron, C.: Recent developments in quantum mechanics 82

Lacki, J., and Ruegg, H.: Representations of Kac-Moody algebras using twisted vertex operators 91

Enz, C.P.: Superconductivity from charged local Boson exchange in strong coupling approximation 122

Fascicle 2/3

15. 3. 1989

Titles presented at the „Rencontre in Theoretical and Mathematical Physics" in honor of Professor Philippe Choquard's 60th birthday, Ecole Polytechnique Fédérale de Lausanne, January 20-21, 1989 139

Enz, P.: Philippe Choquard: a biographical sketch 141

Huguenin, P.: L'Univers dimensionnel de la physique – Essai de physique contemplative .. 144

Titres des communications: Rapport de la Réunion de la SSP des 6 et 7 octobre 1988 à Lausanne 173

Holguin, E., Dutoit, B., Burri, G., Schöpfer, R., and Rinderer, L.: Destruction de l'état mixte à deux dimensions (M) dans les couches cylindriques minces supraconductrices de type I 18

Dutoit, B., and Rinderer, L.: Etude magnéto-optique de l'état intermédiaire 191

Moroni, E.G., and Jarlborg, T.: Total-energy electronic structure calculations for Fe_3 Ni and FeNi 195

Brändle, H., Schoenes, J., and Hulliger, F.: Optical and magneto-optical properties of NdS 199

Fumagalli, P., Schoenes, J., and Fischer, Ø.: Optical properties of $EuMo_6 S_8$ 203

Korner, N., Schoenes, J., and Kaczorowski, D.: Hall effect and electrical resistivity of $UCuP_2$ single crystals 207

Bacsa, W., Ospelt, M., Henz, J., Von Känel, H., and Wachter, P.: Inelastic light (Raman) scattering from strained ultra-short SiGe superlattices 211

Steininger, R., and Bilgram, J.: Light scattering at the solid-liquid interface of cyclohexane . 215

Egolf, P.W.: Schwere-Kapillar-Wellen kleiner Amplituden über suprafluidem Helium II. .. 219

Spycher, R., Laub, D., and Buffat, P.A.: Bombardement ionique avec des ions d'iode: effets en surface 223

Ruterana, P., Buffat, P.A., Prairie, M., and Renken, A.: The structure of the Na_2MoO_4 catalyst for water free dehydrogenation of methanol to formaldehyde 227

Grimmer, H.: A geometrical model of special grain boundaries in corundum 231

Tang, X.-M., Weber, J., Baer, Y., and Favre, M.: Silicide formation for Cu on a-Si:H ... 235

Gavilano, J.L., Sharifi, F., and Van Harlingen, D.J.: Macroscopic quantum tunneling and thermal activation in small-area Josephson tunnel junctions and a dc- SQUID 239

Vyskocil, P., Rička, J., and Binkert, Th.: Phase-transition and local mobility of a polymer chain 243

Gold, J.M., Schmidt, M., and Steinemann, S.G.: XPS study of amino acid adsorption to titanium surfaces ... 246
Athelogou, M., Merté, B., Deisz, P., Hübler, A., and Lüscher, E.: Extremal properties of dendritic patterns: biological applications ... 250
Hiltbrand, E., and Santago, P.: MRI Water-fat classification by differential phase and phase correlation ... 254
Ospelt, M., Henz, J., and Känel, H. von: Structural characterization of ultrashort period Si-Ge superlattices ... 258
Henz, J., Onda, N., Ospelt, M., and Känel, H. von: Parallel electric transport in thin $CoSi_2$ layers on SI (111) ... 262
Blunier, S., Zogg, H., and Weibel, H.: BaF_2-SrF_2-CaF_2 (100) layers on Si(100) with smooth surfaces ... 266
Maissen, C., Masek, J., Blunier, S., Zogg, H., and Weibel, H.: Photovoltaische Infrarotsensoren auf Silizium Substraten ... 270
Faist, J., and Reinhart, F.-K.: Refractive index change due to the band-filling effect in GaAs/AlxGal-xAs phase modulators ... 274
Pavesi, L., Ganière. J.G., and Reinhart, F.-K.: Photoluminescence of disordered $GaAs/Al_xGa_{1-x}$ As quantum wells via Zinc diffusion ... 278
Dinkelacker, F., Deisz, P., Hübler, A., and Lüscher, E.: Properties of hydrodynamic systems with flexible boundary conditions ... 282
Rose, M, Kautzky. T., Deisz, P., Hübler, A., and Lüscher, E.: Resonant stimulation and control of Karman's vortex street ... 286
Georgii, R., Eberl, W, and Lüscher, E.: Resonant stimulation and control of nonlinear mechanical pendulum by Poincaré maps ... 290
Merté, B., Hadwich, G., Binias, B., Deisz, P., Hübler, A., and Lüscher, E.: Formation of selfsimilar dentritic patterns with extremal properties ... 294
Probst, P.-A., and Rittener, J.: Digital temperature controller for low temperature experiments ... 298
Egli, W., and Eliasson, B.: Numerical calculation of electrical breakdown in oxygen in a dielectric-barrier discharge ... 302
Soares, V., Meyer, E., and Rinderer, L.: Nucleation in supercooled metals with high melting point ... 306
Casas, J., and Rinderer, L.: Interface shape effects on the subcritical destruction of the superconducting state along a wire ... 310
Bugmann, G., and Stockar, U. von: Mesure du diamètre moyen de bulles de gaz par la méthode de l'écart- type ... 314
Sayasov, Yu. S.: On the theory of the Z-pinch in a dense plasma ... 318
Leo, W.R., Sahraoui, C., Azam, S., and Strasser, P.: Analyse de fonctions de réponse d'un mini-détecteur scintillateur liquide NE- 213 ... 322
Campagnari, C., Alliegro, C., Chaloupka, V., Cooper, P.S., Egger, J., Gordon, H.A., Hadley, N.J., Herold, W.D., Jagel, E.A., Kaspar, H., Lazarus, D.M., Lee, A.M., Lubatti, H.J., Rehak, P., and Zeller, M.E.: A search for the rare decay $K^+ \to \pi^+ \mu^+ e^-$. ... 326
Scheurer, P.B.: Law of constant passion and inertia of the cosmic distance ... 331
Chevalier, J.: Is gravitational energy-momentum really non-localizable ? ... 335
Wandelt, A., Eberl, W., Hübler, A., and Lüscher, E.: Transformation to normal time for the calculation of Poincaré maps in a closed form ... 339
Hübler, A.: Adaptive control of chaotic systems ... 343
Rückerl, B., Eberl, W., and Lüscher, E.: Description of the dynamics of nonlinear extended systems by iterative maps ... 347
Lieberherr, T., and Beck, H.: Phonon induced delocalization near the mobility edge of an amorphous semiconductor ... 351
Loeffel, J.-J.: Bethe lattices and inverse orbits ... 355
Holguin, E, Romero, J., Roy, H.-V., Huguenin, R., and Rinderer, L.: Dépendance en température de la résistivité électrique dans le système $YBa_2Cu_3O_{7-\delta}$ sous l'action d'un champ magnétique ... 359

Fascicle 4
30. 5. 1989

Gisin, N.: Stochastic quantum dynamics and relativity 363
Nenciu, G., and Rasche, G.: Adiabatic theorem and Gell-Mann-Low formula 372
Abraham, K.J.: Vacuum polarization and the trace anomaly 389
Singh, M.: Time interval statistics of a symmetric two-peaked spectrum 398
Perroud, M.: Thermodynamics of dissipative systems II 410
Massa, C.: Upper bound on temperature 420
Massa, C.: Equation of hydrostatic equilibrium and temperature dependent gravitational constant 424
Fabris, J.C., and Kerner, R.: Généralisation de la supergravité à 11 dimensions avec les invariants d'Euler 427
Barut, A.O.: Problème relativiste deux corps en electrodynamique quantique 436
Raemy, F., Sayasov, Yu. S., and Schneider, H.: The nonlinear ion-acoustic waves in a current carrying collision- dominated plasma 444

Fascicle 5
3. 7. 1989

Wurtz, D., and Hartung, G.: Introduction to cellular automata computing, neural network computing and transputer based special purpose computers 461
Grassberger, P.: Problems in quantifying self-generated complexity 489
Derrida, B.: Dynamics of diluted and asymmetric neural network models 512
Clouqueur, A., and d'Humières, D.: R.A.P., a family of cellular automaton machines for fluid dynamics 525
Pomeau, Y.: Localised chaos in extended geometries 542
Lüscher, E., and Hübler, A.: Resonant stimulation of complex systems 544
Hasler, M.: Avoiding complex behavior. 552
Hongler, M.-O.: Chaos in mechanical engineering devices 573
Voros, A.: Selected topics on „Quantum Chaos" 595
Gutzwiller, M.C.: Fractals in classical mechanics 613

Fascicle 6/7
11. 9. 1989

Steinemann, S., Martin, J.-L., Baer, Y., Stella, A., Miglio, L., and Bassani, F.: Foreword . . . 631
Fonda, L., Puglisi, M., Rosei, R., and Wrulich, A.: The Elettra project: Status report 633
Fiorini, P., De Seta, M., and Evangelisti, F.: Quantum effects in amorphous superstructures . 645
Bongiovanni, G., Moser, J., and Staehli, J.L.: Optical spectroscopy of quantum wells under high excitation 650
Cingolani, R., and Ploog, K.: Electronic states and optical transitions in undoped and modulation doped GaInAs/AlInAs quantum wells and superlattices 655
Grosso, G., Moroni, S., and Pastori Parravicini, G.: Electronic energy levels of multilayer structures with the renormalization method 660
Rossi, G., Santaniello, A., De Padova, P., Jin, X, and Chandesris, D.: Local structure of the chemisorption of Co on Si(111)7x7 and of the epitaxial $CoSi_2$ interface 666
Van der Klink, J.J., Borsa, F., Rigamonti, A, and Höchli, U.T.: Phase transitions and ionic displacements in doped potassium tantalates 671
Ricci, M.A., Ruocco, G., Rocca, D., and Vallauri, R.: Collective dynamics in liquid water . . 676
Ferrari, L., and Russo, G.: Electrons at the glass transition 681
Arrigoni, E., Strinati, G., and Castellani, C.: A mean-field description of the antiferromagnetism of CuO_2 layers 686
Lugli, P.: Monte Carlo simulation of ultrafast phenomena 691
Probst, P.-A., and Huguenin, R.: Local electron scattering rates in noble metals 696
Cricenti, A., Selci, S., Felici, A.C., Generosi, R., Gori, E., Djaczenko, W., and Chiarotti, G.: Application of scanning tunneling microscopy to structural studies of DNA 701

Châtelain, A.: Metallic clusters of atoms and small particles: Some structural and electronic properties ... 706
Borghese, F., Denti, P., Saija, R., and Sindoni, O.I.: Propagation of electromagnetic waves through non-homogeneous media ... 710
Fiorani, D.: Flux creep in high-Tc superconductors ... 715
Martini, M., and Pio, F.: Optical properties and ionic transport due to defects in SiO_2 ... 720
Benoit, W.: Study of the dislocation dynamics by acoustic spectroscopy ... 725
Priolo, F., Spinella, C., and Rimini, E.: Amorphous to single crystal transition in Si induced by ion-beam irradiation ... 730
Cuccoli, A., and Tognetti, V., and Lovesey, S.W.: Critical and paramagnetic spin fluctuations in Heisenberg ferromagnets ... 735
Brovetto, P., Delunas, A., Maxia, V., and Spano, G.: Thermoluminescence of calcium fluoride ... 740
Colombo, L., Borghesi, A., Rojas, S., and Wu, W.S.: Comparative infrared vibrational spectroscopy of chemical vapour deposition SiO_2 films ... 742
Grasso, V., Neri, F., Patanè, S., Silipigni, L., and Piacentini, M.: Electronic transport properties of $FePS_3$ ... 744
Scacco, A., Somma, F., Rossi, M., De Matteis, F., Baldacchini, G., and Grassano, U.M.: Off-axis configuration of F_A(Li) centres in KF ... 746
Bosio, C., Harbeke, G., Czaja, W., and Meier, E.: Vacuum ultraviolet measurements on c-Sio_2 and a-SiO_2 ... 748
Kerkoc, P., and Günter, P.: 4-(N,N-dimethylamino)-3-acetamidonitrobenzene bulk crystals and single crystal cored fibers for nonlinear optical applications ... 750
Jaggi, R.: The Corbino disk ... 752
Mäder, K.A., Känel, H. von, and Baldereschi, A.: Ab-initio pseudopotential study of $Ge_{1-x}Sn_x$ alloys ... 754
Marabelli, F., and Wachter, P.: The far infrared optical reflectivity of U_2PtC_2 ... 956
Romero, J., and Huguenin, R.: Surface scattering and DC size effects in aluminium ... 758
Schenkel, M., De Caro, C., Renn, A., and Wild, U.P.: Spectral hole-burning and multiple storage of images ... 760
Schlup, W.A., and Guéret, P.: Current voltage characteristics of semiconductor heterostructures – integration of sharply peaked transmissivities ... 762
Airoldi, G., Carcano, G., Riva, G., Rivolta, B., and Taini, L.: Thermodynamics of the phase transition in NiTi alloys ... 764
Cecchi, E., Mosconi, M.M., Rivolta, B., Ranucci, T., Vicentini, B., and Airoldi, G.: Thermal expansion as a function of phase transition cycling in NiTi alloys ... 766
Grasso, F., Musumeci, F., and Triglia, A.: Diffuse layer electrical parameters at metal water interface in the 0.01 Hz to 100 KHz range ... 768
Fazio, R., Falci, G., and Giaquinta, G.: Dissipative mechanisms in granular superconductors ... 770
Rovere, M., Binder, K., and Heermann, D.W.: Simulation of the liquid-gas transition with finite size analysis ... 772
Marinaro, M., Noce, C., and Romano, A.: Limit of zero-width conduction band for the extended Falicov-Kimball model ... 774
Bacsa, W., Ospelt, M., Henz, J., Känel, H. von, and Wachter, P.: Inelastic light (Raman) scattering from confined phonos in strained short-period (001) Si/Ge superlattices ... 776
Egolf, P.W., Olsen, J.L., and Röhricht, B.: An instability of the two fluid hydrodynamics of surface waves on superfluid ^{4}helium ... 778
Rubini, S., Dimitropoulos, C., Borsa, F., and Gotthardt, R.: NMR study of martensitic transformation in A Cu-Zn-Al alloy ... 780
Soares, V., Meyer, E., and Rinderer, L.: Crystallization of rapidly quenched metal droplets with high melting point ... 782
Agostinelli, E., Bohandy, J., Kim, B.F., Green, W.J., Phillips, T.E., Adrian, F.J., and Moorjani, K.: Bi-Sr-Ca-Cu-O laser deposited thin films: A comparison between resistivity and MAMMA response ... 784
Amoretti, G., Caciuffo, R., Blaise, A., Fournier, J., Hutchings, M.T., Osborn, R., and Taylor, A.D.: High energy neutron spectroscopy in crystal field split 5f systems ... 786

Andreozzi, L., Leporini, D., Giordano, M., Martinelli, M., Pardi, L., Sapia, P., and Galli, G.: Magnetic resonance studies of polymeric mesophases 788
Azzoni, C.B., and Paleari, A.: EPR study of X-irradiated yttria stabilized zirconia 790
Bolzoni, F., and Manfredotti, G.: New method for Hc2 measurement in high Tcsuperconductors 792
Bonetti, E., and Campari, E.G.: Structural instability and transformations in amorphous metals studied by mechanical spectroscopy 794
Borsa, F., Corti, M., Rega, T., Rigamonti, A., and Ziolo, J.: Magnetic correlations and antiferromagnetic order in $La_{2-x}Sr_xCuO_4$ 796
Buluggiu, E., Giori, D.C., Valenti, A., Vera, A., Calestani, G., and Amoretti, G.: ESR and x-ray analysis of superconducting transitions in c ≈ 31 and c ≈ 37 ^{0}A BSCCO systems 798
Ciccarello, I., Fazio, C., Guccione, M., and Li Vigni, M.: Dynamics of fluxons in field-cooled high-Tc superconductors 800
Donzelli, O., Fratucello, G., and Ronconi, F.: Bond short-range order in amorphous ribbons . 802
Gelardi, F.M.: Spin-spin relaxation of E' centers at low temperature 804
Giovannella, C., Lucchini, C., Messi, R., Giannelli, A., and Lecuyer, B.: Dynamics of intra and intergranular junctions 806
Lanotte, L., and Annunziata, A.: High quality magnetic strips of electrodeposited Co-P amorphous alloy 808
Vinai, F.: Magnetic and structural properties of amorphous alloys and applications 810
Marusi, G., Moze, O., Paoluzi, A., Pareti, L., Solzi, M., and Turilli, G.: The measurement of the magnetic anisotropy and some related properties in hard magnetic materials 812
Pflugi, A., Indlekofer, G., and Oelhafen, P.: Electron spectroscopy of liquid alloys containing transition metals 814
Schoenes, J., and Vogt, O.: Electrical resistivity of $U_xTh_{1-x}Sb$ (x=0, 0.05, 030, 0.34, 0.97, 1) from 2 to 1000 K 816
Angeli, E., Betti, M.G., Pennino, U. del, and Mariani, C.: Observation of a new mode in the energy loss spectrum of the Sb/GaAs(110) system 818
Bartolini, A., Ercolessi, F., and Tosatti, E.: Magic vicinal surfaces induced by reconstruction . 820
Bracco, G., Tatarek, R., Tommasini, F., and Vandoni, G.: Oxygen induced reconstruction of Ag(110) 822
Chen, X.J., Ercolessi, F., Tosatti, E., and Trayanov, A.: Surface supermelting with long-range potential 824
Della Valle, F., and Modesti, S.: Exchange excited f-f transitions in the electronenergy-loss spectra of rare-earth metals 826
Finocchi, F., Bertoni, C.M., and Ossicini, S.: Selfconsistent calculations of the electronic properties of simple metal surface 828
Manghi, F.: Ab-initio calculation of the anisotropic dielectric response of GaAs(110)/Sb 830
Pennino, U. del, Di Bona, A., Tombesi, A., and Valeri, S.: XPS investigation of the $YBa_2Cu_3O_{7-\delta}$ 832
Santini, P., Ruggerone, P., Miglio, L., and Benedek, G.: Surface crystallography and lattice dynamics: GaAs(110) VS Si(111) 2x1 834
Valeri, S., and Tonini, R.: Ion-excited Auger electron emission from solid surfaces 836
Baldereschi, A., Ortiz, G., and Resta, R.: Charge transfer vs. energy level pinning at semiconductor interfaces 838
Milani, P., Châtelain, A., and Heer, W. de: Measurements of metal atom and cluster polarizabilities 840
